Mr. Prashant K.  
Gupta

Honeywell, Inc.  
115 Tabor Road  
Morris Plains, NJ 07950

Dear Mr. Gupta:

The purpose of this letter is to approve the updated full schedule for submittal dates for the Remedial Investigation and Feasibility Study Reports (and components for Operable Unit 2 (OU2) Site-Wide Groundwater and Cell Building Area for the LCP Chemicals Site, Brunswick, Georgia submitted on August 31, 2021. EPA notes the following dates in particular:

- Remedial Investigation Report: 12/17/2021
- Remedial Action Objectives Technical Memorandum: 4/6/2022
- Remedial Technologies, Screening, Alternatives Tech Memo: 7/5/2022
- Feasibility Study Report: 10/18/2022

as being critical to receive to move forward with remedy selection in an expeditious manner. In addition, multiple pre-submittal and post comment meetings are planned and needed to facilitate the process. EPA looks forward to working with all parties to complete the cleanup actions at the LCP Brunswick NPL Site.

If you have questions regarding the preceding, please contact me at (404) 562-8506 or [pope.robert@epa.gov](mailto:pope.robert@epa.gov).

Sincerely,
